

GCI World 2026 April

Final Assignment Tutorial

- What is Final Assignment?
- How to Get Started
- How to Submit

(Recap) Course Completion Requirements

You will be evaluated on the following assignments:

		Total	Completed	Honors	Outstanding
	Attendance Surveys	14	7+	7+	Selected Students (based on overall scores)
	Homework	24 (=8 HW) points *3 points max, 2 points if late	14+ points	14+ points	
	Final Assignment	1	submit	TOP 10%	
You need to submit the final assignment to complete the GCI course.				AND	
				TOP 20%	

What is Final Assignment?

About Final Assignment

Your task is to create a **business proposal based on the given data**. From data and market analysis, you need to **identify the client's business problem and present a solution**.

You will need to do market analysis, exploratory data analysis, building machine learning models, and business proposal.

Proposal for a New Service Using AI: Accelerating Business with Data Analysis

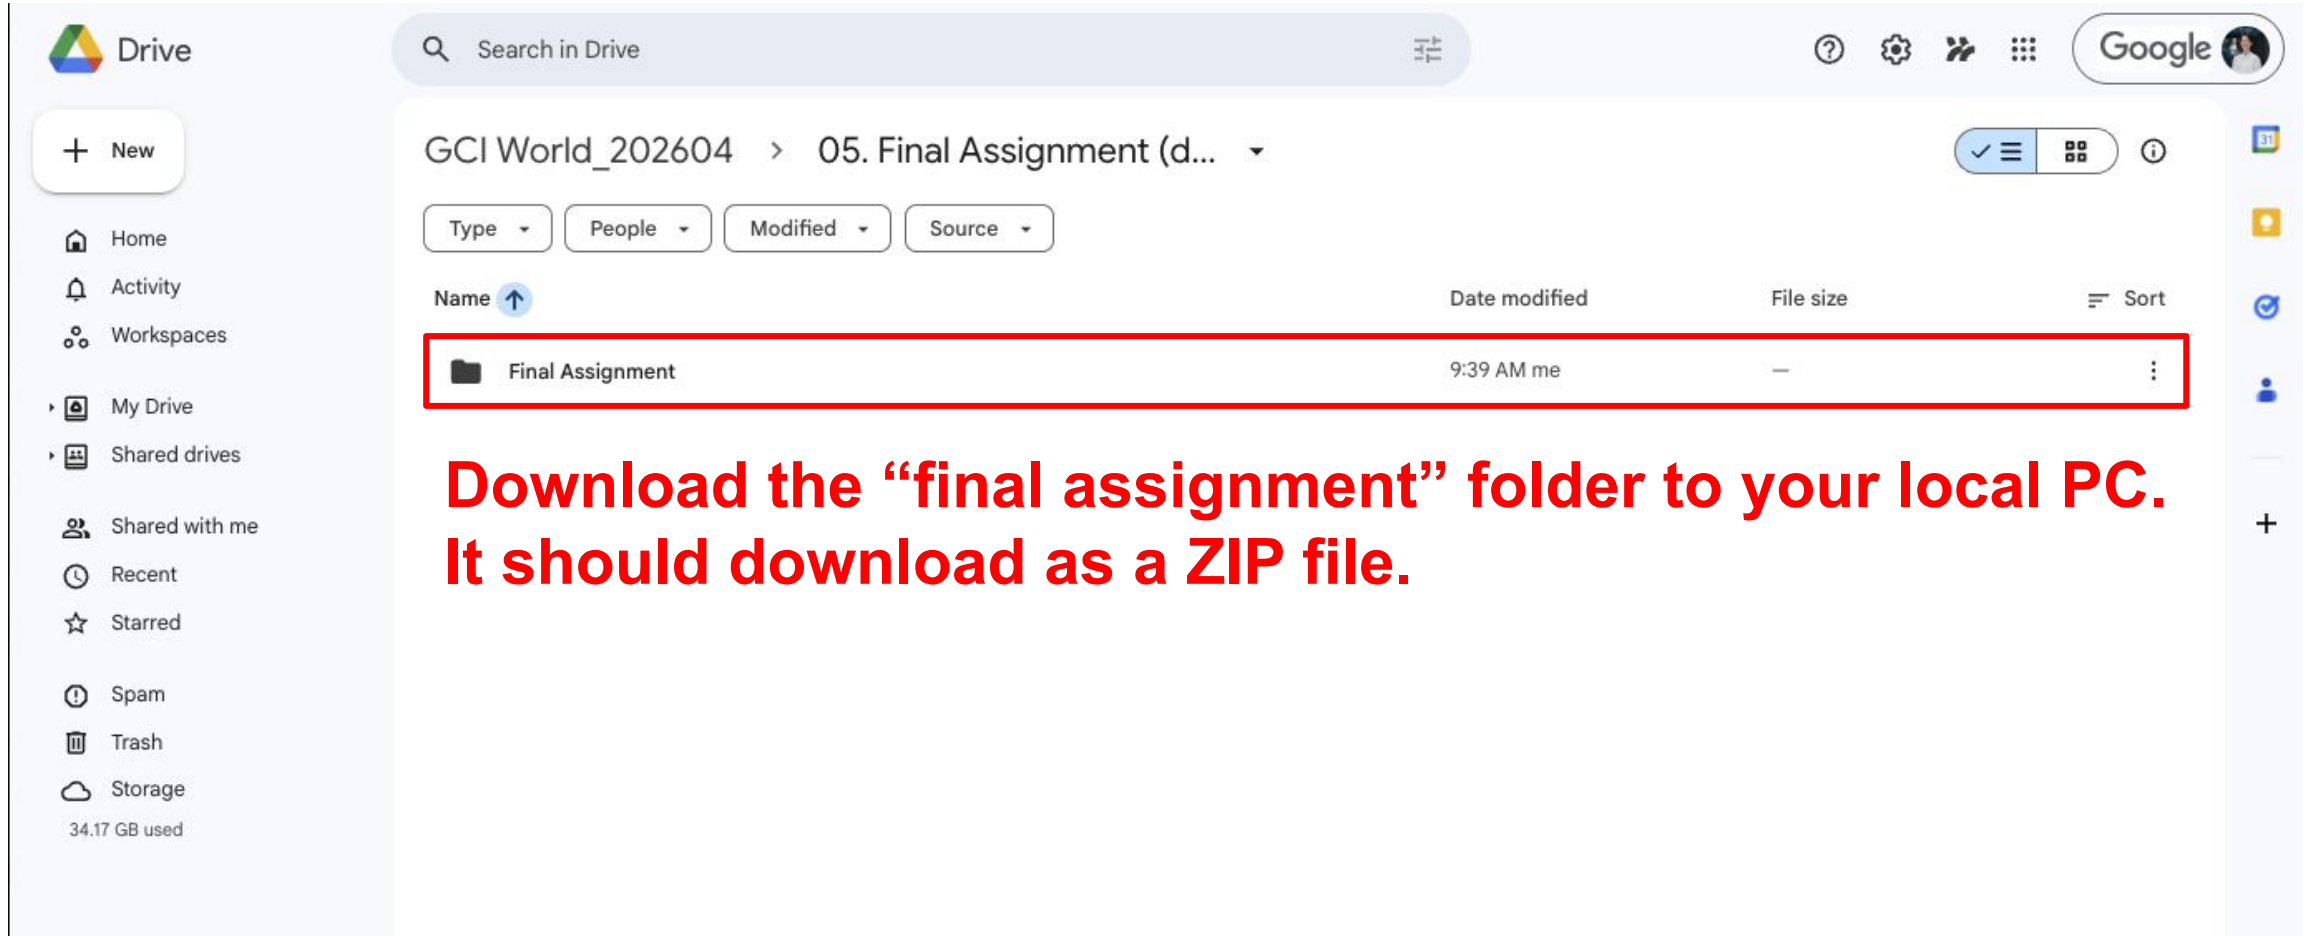

Table of contents

- Current State of the Consumer Finance Industry
- Prediction Using Machine Learning Models
- Our Business Proposal

How to Get Started

1. Download the materials

Download the “Final Assignment” folder from the class materials

The screenshot shows the Google Drive interface. On the left is a sidebar with navigation options: Home, Activity, Workspaces, My Drive, Shared drives, Shared with me, Recent, Starred, Spam, Trash, and Storage (34.17 GB used). The main area shows a folder named 'GCI World_202604' containing a sub-folder '05. Final Assignment (d...'. Below this, a table lists the contents of the '05. Final Assignment' folder. The table has columns for Name, Date modified, File size, and Sort. A single row is visible, representing the 'Final Assignment' folder, which is highlighted with a red rectangular box. The text 'Download the “final assignment” folder to your local PC. It should download as a ZIP file.' is overlaid in red on the bottom right of the screenshot.

Name	Date modified	File size	Sort
Final Assignment	9:39 AM me	—	

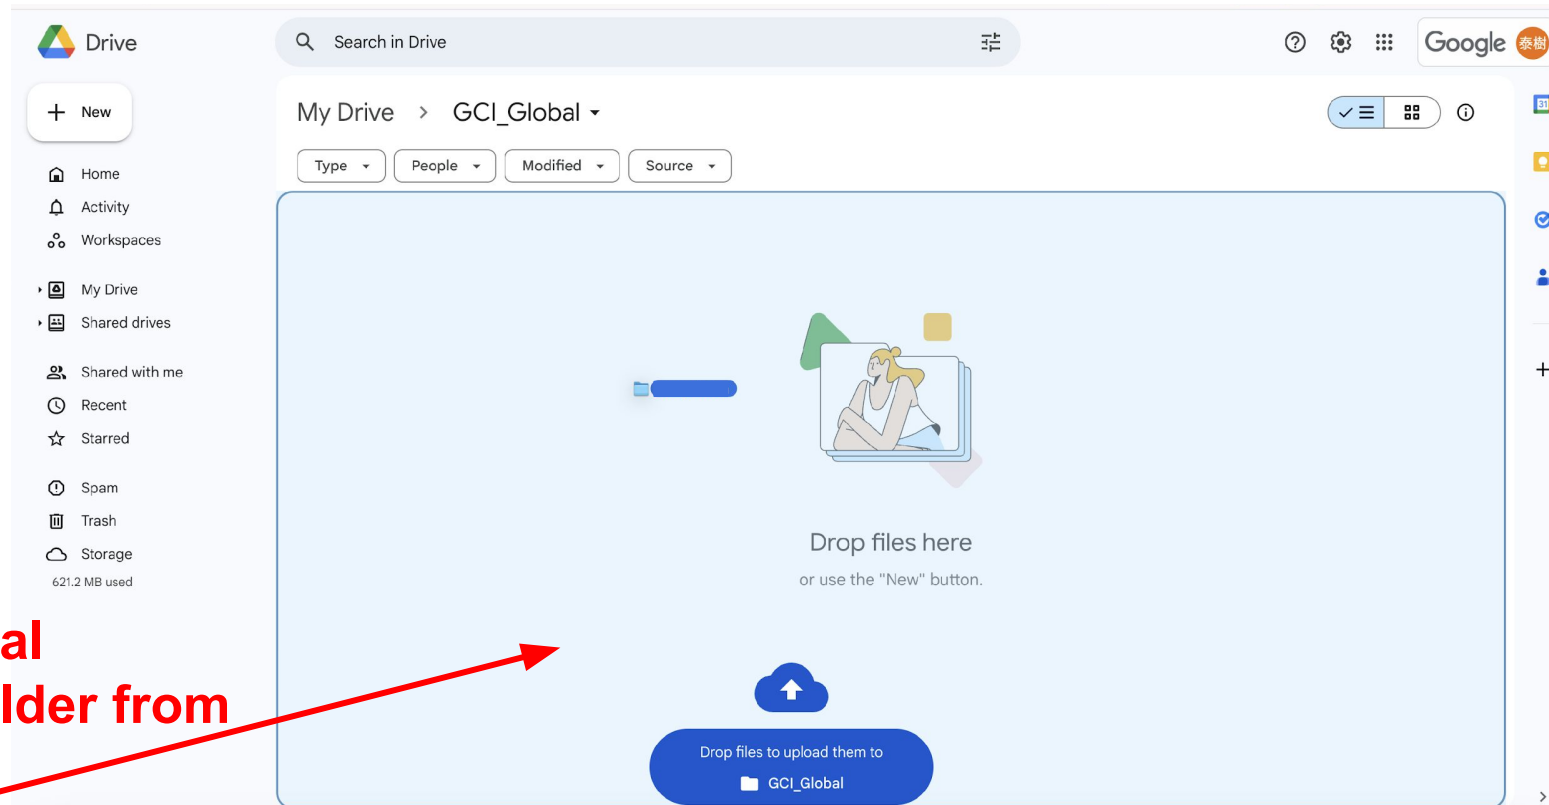

**Download the “final assignment” folder to your local PC.
It should download as a ZIP file.**

2. Upload the dataset to your Google Drive

Unzip the downloaded ZIP file.

Then, upload the “Final Assignment” folder to your MyDrive.

(It can be anywhere in your MyDrive, but you will need to adjust the PATH accordingly later)

Upload the “Final Assignment” folder from your local PC

3. Create a Colab notebook

Inside the folder where the data you uploaded is, create a new Colab notebook

The screenshot shows the Google Drive interface. On the left, the 'New' menu is open, displaying options like 'New folder', 'File upload', 'Folder upload', and various Google apps. The 'More' option is selected, leading to a sub-menu where 'Google Colaboratory' is highlighted. A red arrow points from the text 'If you can't find Google Colaboratory, find from "Connect more apps"' to the 'Connect more apps' option in the sub-menu.

Click the "New" on the top left of Google Drive, then go to More -> Google Colaboratory

If you can't find Google Colaboratory, find from "Connect more apps"

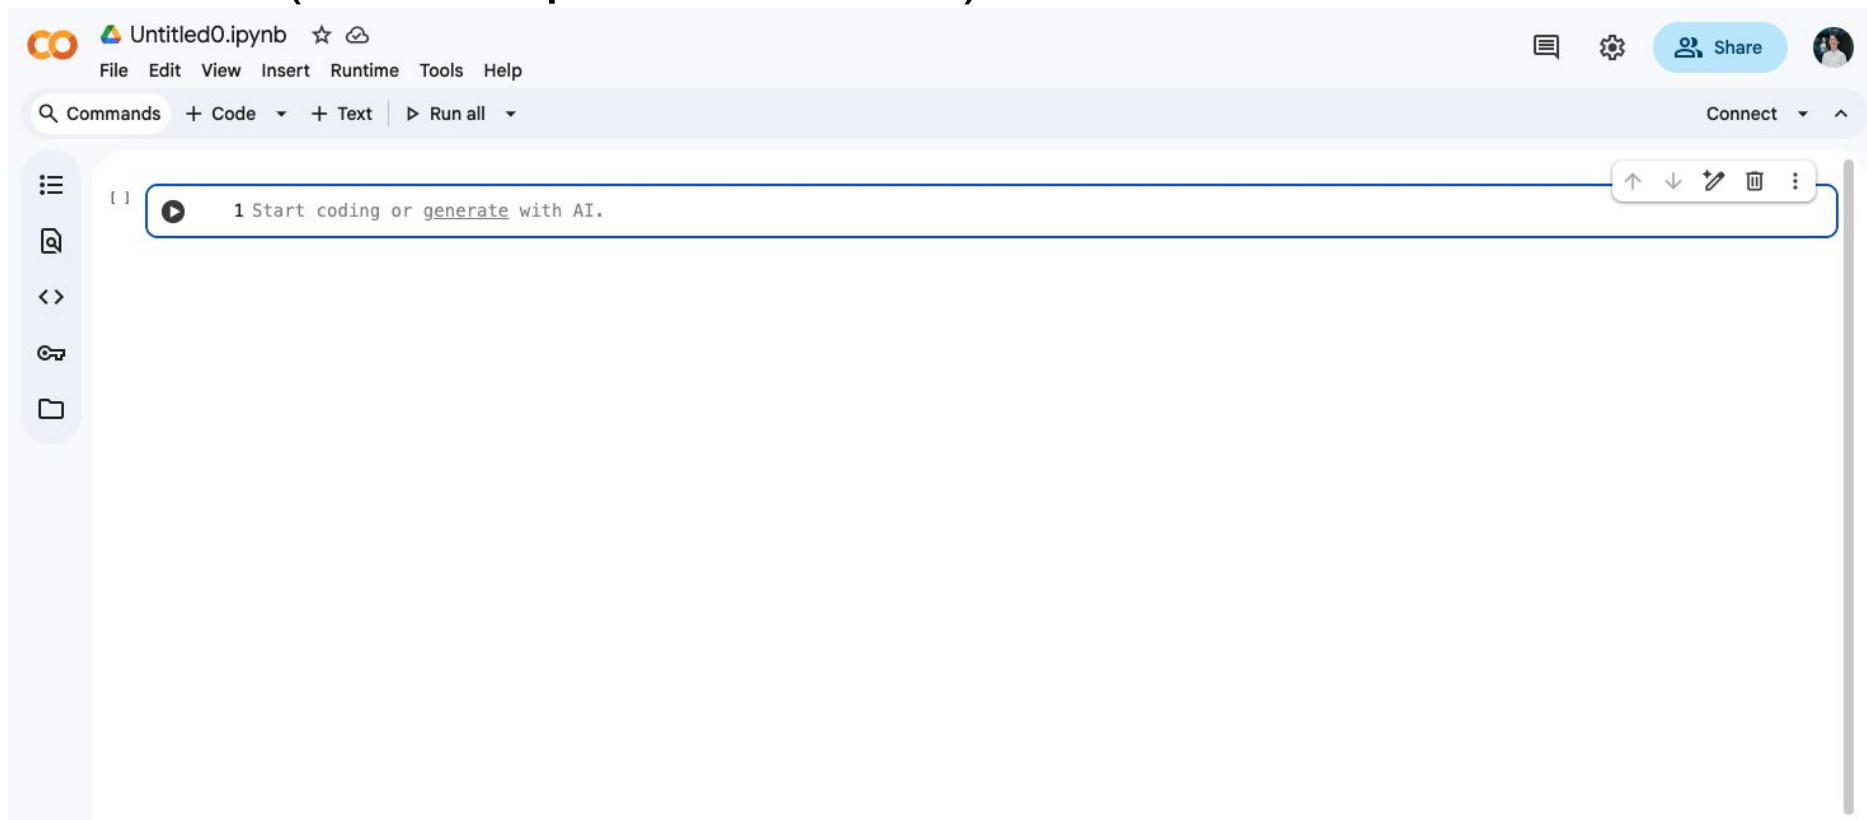

4. Happy Coding!

Start writing codes!

Some hints:

- Import libraries
- Mount Google Drive (see competition tutorial)
- Load dataset (see competition tutorial)

How to Submit

1. Select the assignment

Login to Omnicampus and select the assignment.

Frequently Asked Questions

Q. Can I resubmit my work?

A. Yes, you can submit as many times as you want if it is before the deadline.

Q. Can I use any generative AI?

A. You may, but be sure to include the chat history URL in the list of references.

Q. What do I need to submit?

A. Slides (up to 15 pages, PDF format), Jupyter notebook (or python code), and list of references.

Q. Are late submissions accepted?

A. No.

Final Assignment Workflow

Repeat the process ↓

Understand the background

Create a hypothesis

Deepen your hypothesis

Create your proposal

Verify your proposal

Data Engineering Approach

EDA
Data Preparation

- Understand the meaning of each feature
- Identify the target variable

Create Your Hypothesis

- Identify the problem from EDA and survey results

EDA

- Focus on your hypothesis and conduct further data analysis
- Create new features if needed

Identify the bottleneck

- Identify the workflow and stakeholders related to your hypothesis to find a solution to the problem you identified
- Survey existing solutions

Create your proposal

- List possible proposals based on your findings
- Set metric(s) to evaluate the proposals

Verification

- Evaluate your proposal's effectiveness from results of your predictive model or data analysis
- Identify what elements would be affected to evaluate your proposal
- Pick the proposal that is most effective

Business mindset

Understand the background of the market

- What kind of business does the client do?
 - What do they focus on?
 - What are the trends?
- What are some common problems?
