

GCI World 2026 April

In-Class Competition Tutorial

松尾・岩澤研究室

MATSUO-IWASAWA LAB UTOKYO

- What is In-Class Competition?
- How to Submit

(Recap) Course Completion Requirements

You will be evaluated on the following assignments:

	Total	Completed	Honors	Outstanding
 Attendance Surveys	14	7+	7+	Selected Students (based on overall scores)
 Homework	24 points (=8 HW) *3 points max, 2 points if late	14+ points	14+ points	
 Final	1	submit	TOP 10%	
You need to participate in the competition to become Honors/Outstanding Student.				AND
 Competition	1	(optional)	TOP 20%	

What is In-Class Competition?

About In-Class Competition

Students compete with one another based on their scores through In-Class Competition

Do your best to achieve a high ranking!!!

Leaderboard

RANK	NAME	SCORE
	25UT_Luffy	0.74838
2	25UT_Naruto	0.74114
3	25UT_Tanjiro	0.73355

About the Competition

In this In-Class competition, you will work on the “**National Football League (NFL) Draft Prediction**” competition.

Your task is to **create a machine learning model that best predicts whether an athlete will be selected in the NFL draft.**

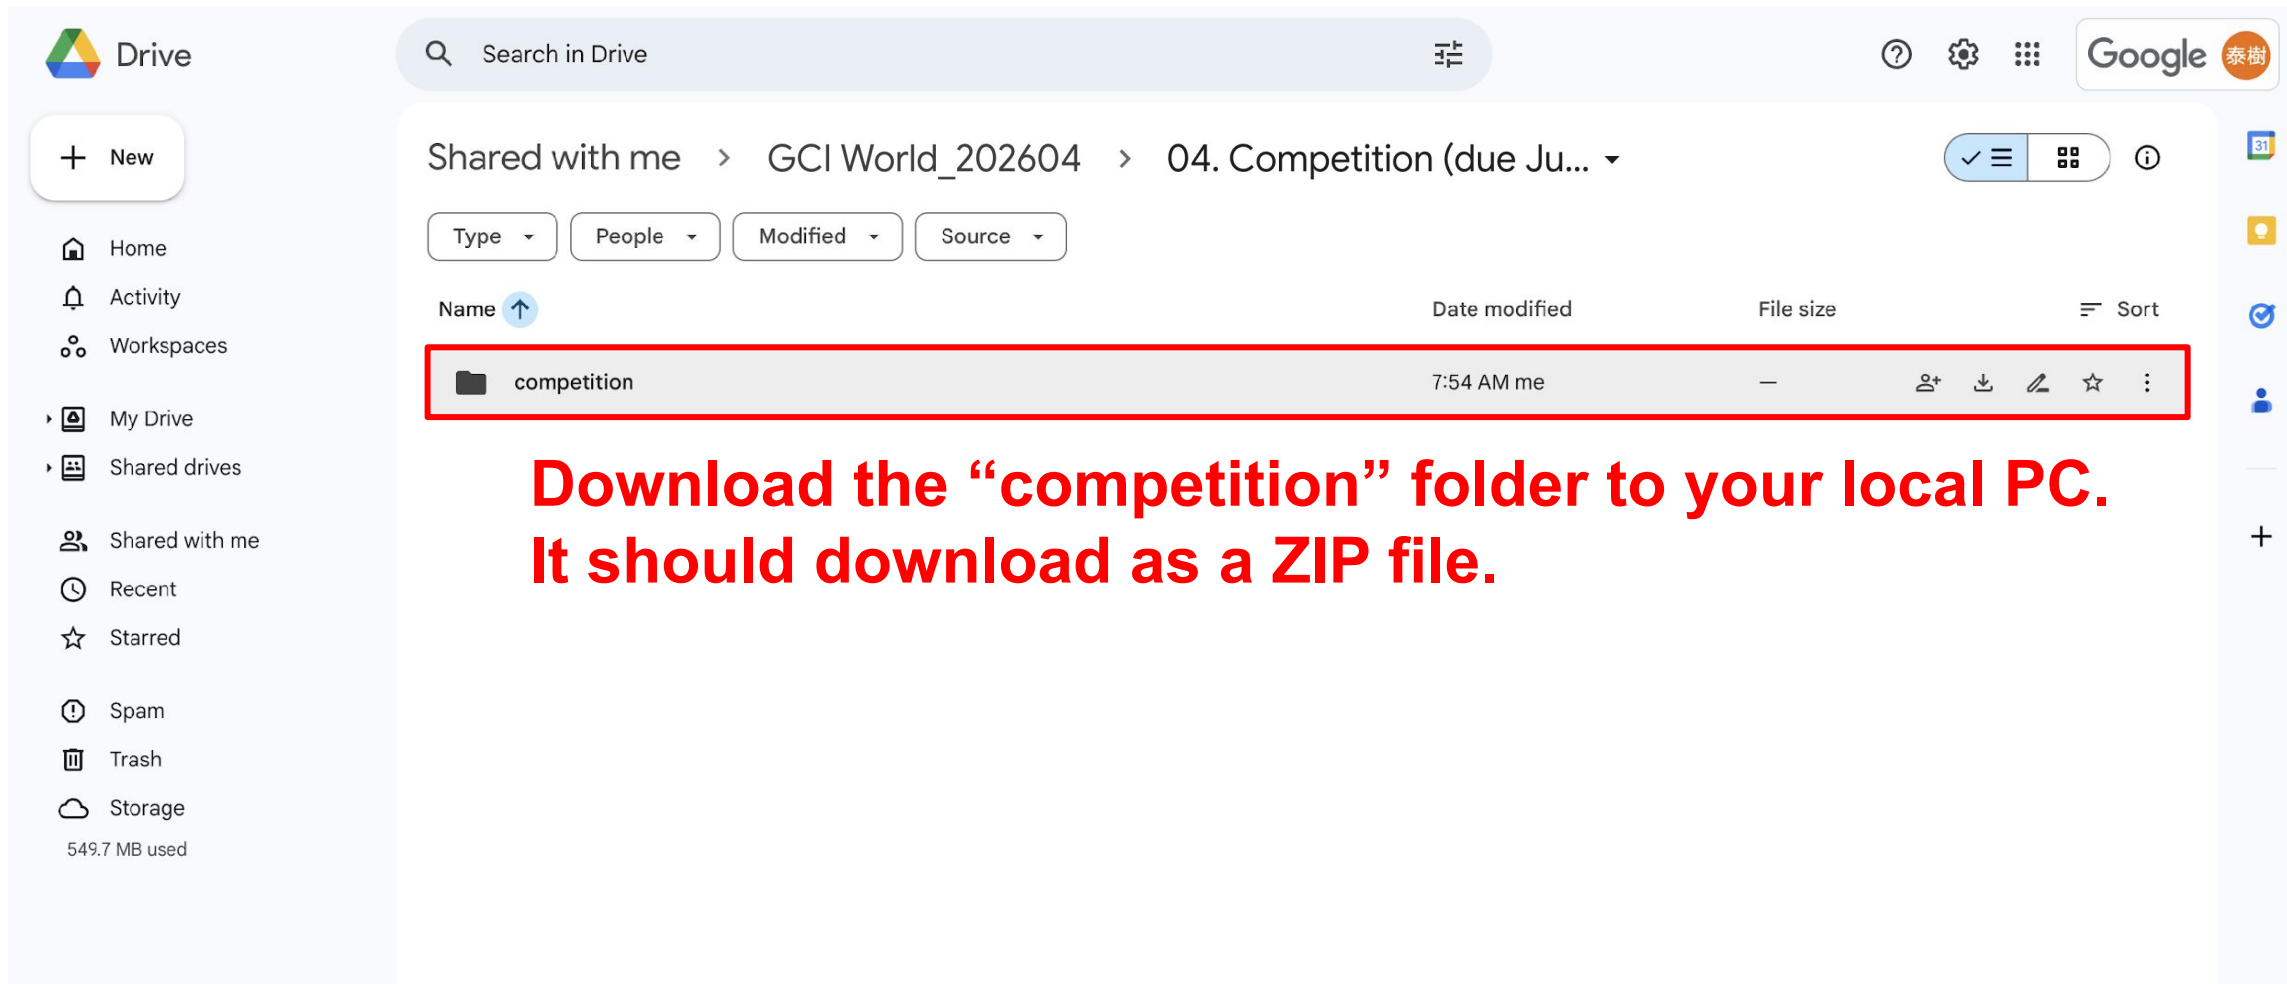

<https://www.nytimes.com/athletic/live-blogs/nfl-draft-2025-live-updates-picks-trades-grades-round-1/dEfINpexDSou/>

How to Submit

1. Download the materials

Download the “competition” folder from the class materials

The screenshot shows the Google Drive web interface. The left sidebar contains navigation options: Home, Activity, Workspaces, My Drive, Shared drives, Shared with me, Recent, Starred, Spam, Trash, and Storage (549.7 MB used). The main area shows a breadcrumb path: Shared with me > GCI World_202604 > 04. Competition (due Ju...). Below the path are filters for Type, People, Modified, and Source. A table lists the contents of the '04. Competition' folder, with the 'competition' folder highlighted by a red box. The table has columns for Name, Date modified, File size, and Sort. The 'competition' folder is listed with a date modified of 7:54 AM and a file size of —. To the right of the folder name are icons for sharing, downloading, editing, favoriting, and a menu.

Name	Date modified	File size	Sort
competition	7:54 AM me	—	

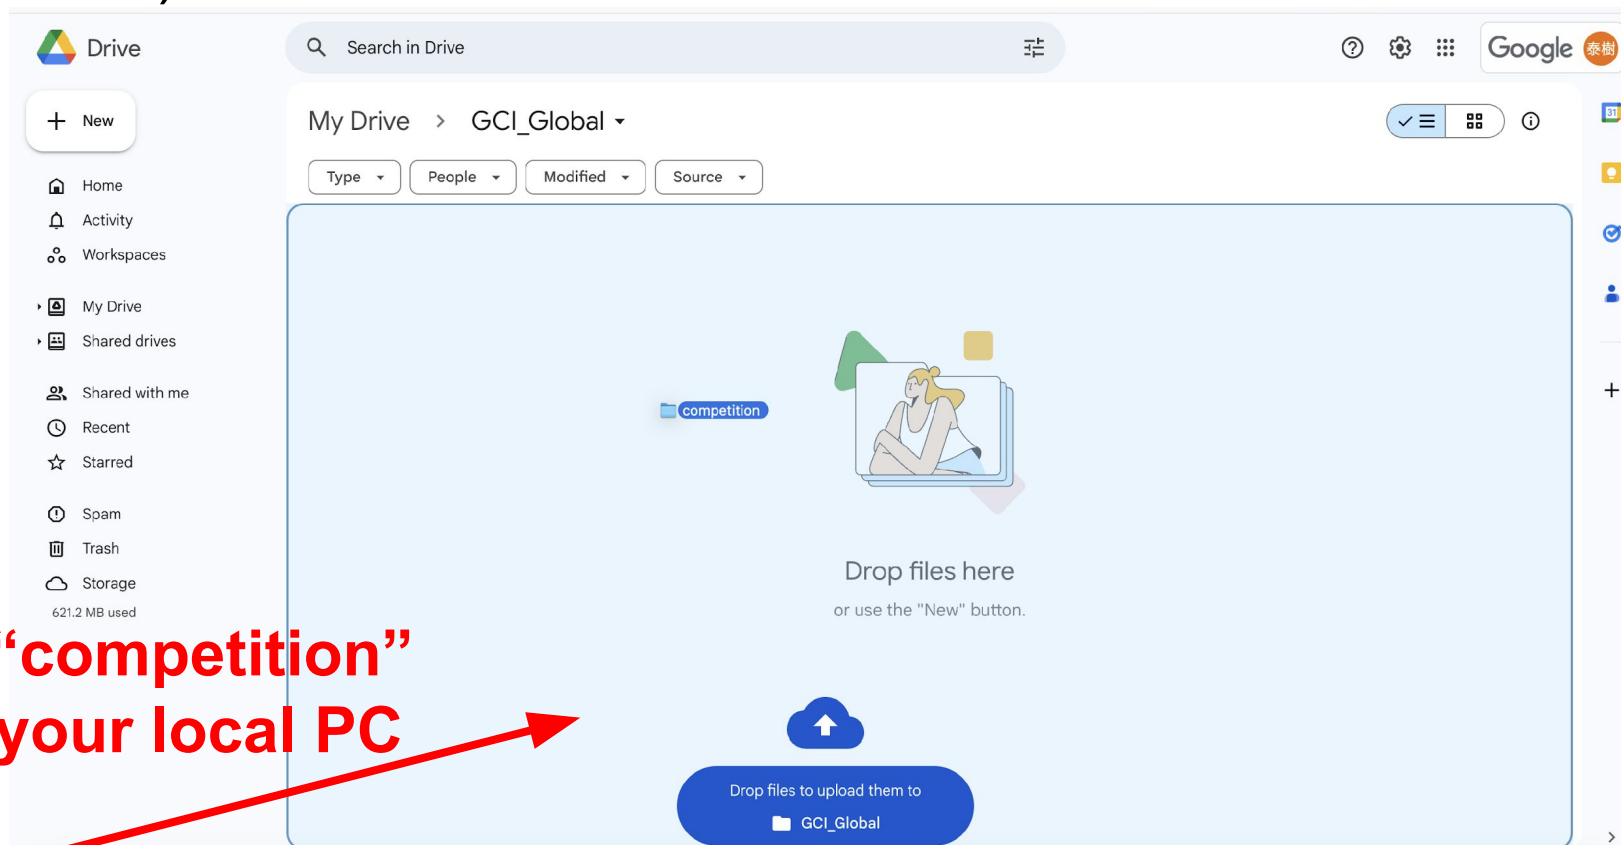

**Download the “competition” folder to your local PC.
It should download as a ZIP file.**

2. Upload the materials to your Google Drive

Unzip the downloaded ZIP file.

Then, upload the “competition” folder to your MyDrive.

(It can be anywhere in your MyDrive, but you will need to adjust the PATH accordingly later)

**Upload the “competition”
folder from your local PC**

3. Open the baseline.ipynb inside “competition” folder

Scroll down a bit and change the PATH so that it points to the directory where you uploaded the “competition” folder

The screenshot shows the Google Colab interface with the following elements and annotations:

- Files Panel (Left):** Shows a directory tree with 'drive' > 'MyDrive' > '00_GCIGlobal' > 'competition'.
 - (1) Click File icon: Points to the file icon in the top left of the Files panel.
 - (2) Go inside /drive/MyDrive and find “competition” folder: Points to the 'competition' folder in the directory tree.
- Context Menu:** A right-click menu is open for the 'competition' folder, with 'Copy path' highlighted.
 - (3) Click “Copy path”: Points to the 'Copy path' option in the menu.
- Code Editor (Right):** Contains a notebook cell with the following code:

```
1 # Importing libraries
2 import numpy as np
3 import pandas as pd
4 import matplotlib.pyplot as plt
5 import seaborn as sns
6
7 import warnings
8 warnings.filterwarnings('ignore')
```

Below the code, there is a section titled "IMPORTANT:" with instructions to replace the path in the %cd command. It provides two examples based on where the folder was uploaded.

Next, we need to navigate to where the competition folder is located

IMPORTANT:

Change the path in the %cd command below to match the folder where this notebook is saved on Google Drive by replacing "WhereThisNotebookIsLocated" with your actual folder path.

Examples:

 - You uploaded competition folder directly under MyDrive (the default folder when you open Google Drive)
 - Change to "/content/drive/MyDrive/competition"
 - You uploaded competition folder inside a folder named 00_GCIGlobal under MyDrive
 - Change to "/content/drive/MyDrive/00_GCIGlobal/competition"

You can easily locate your notebook's directory by:

 1. Open the Files panel on the left side of Colab
 2. Navigate through the "drive" and "MyDrive" folders until you find your notebook's folders
 3. Click the more actions icon (three vertical dots, :) next to the folder name
 4. Select the option "Copy path"

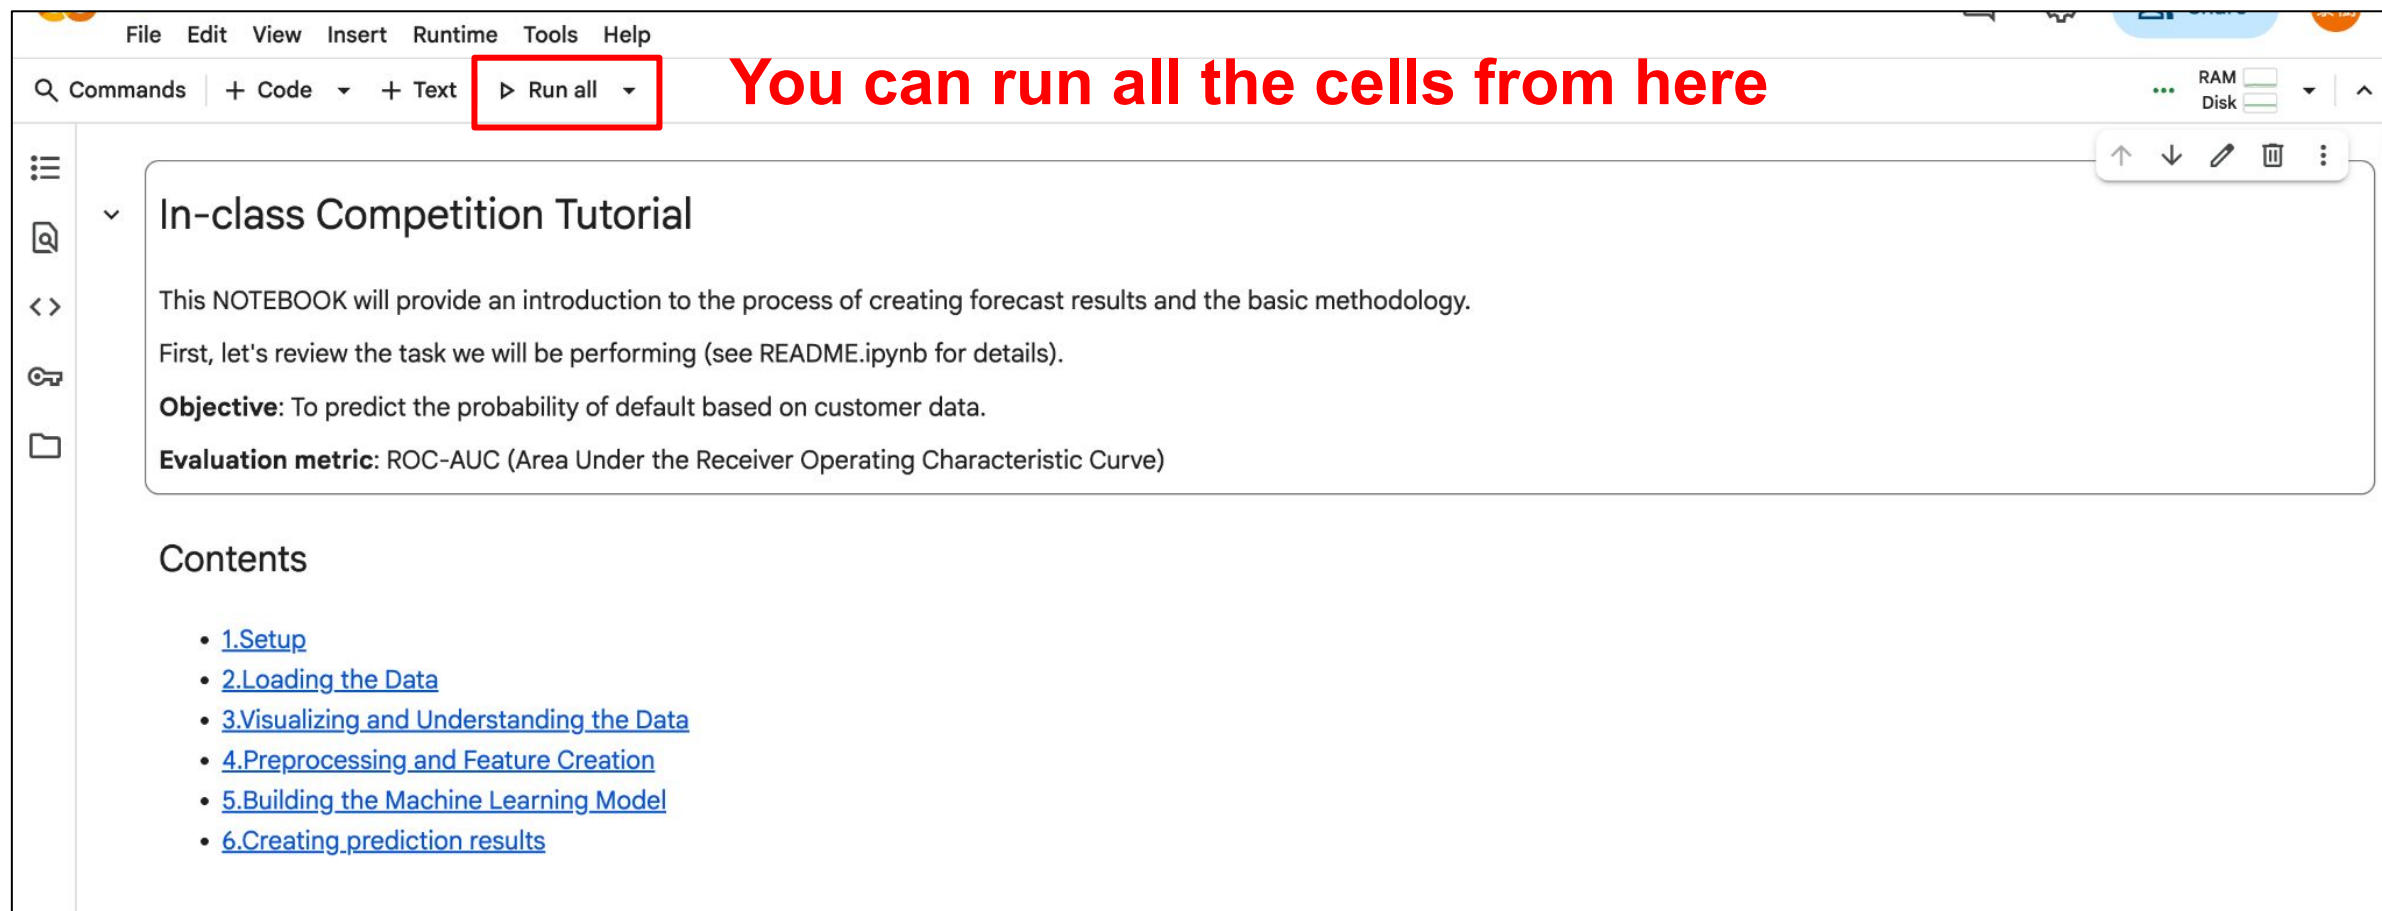

Below the instructions, a code cell is shown with the following code:

```
1 # Specify the directory where this notebook is located after %cd.
2 %cd "/content/drive/MyDrive/WhereThisNotebookIsLocated"
```

 - (4) Replace /content/drive/MyDrive/WhereThisNotebookIsLocated with the copied path: Points to the path in the code cell.

4. Run the tutorial to create submission.csv

Please run all the cells in “baseline.ipynb” to create “submission.csv”

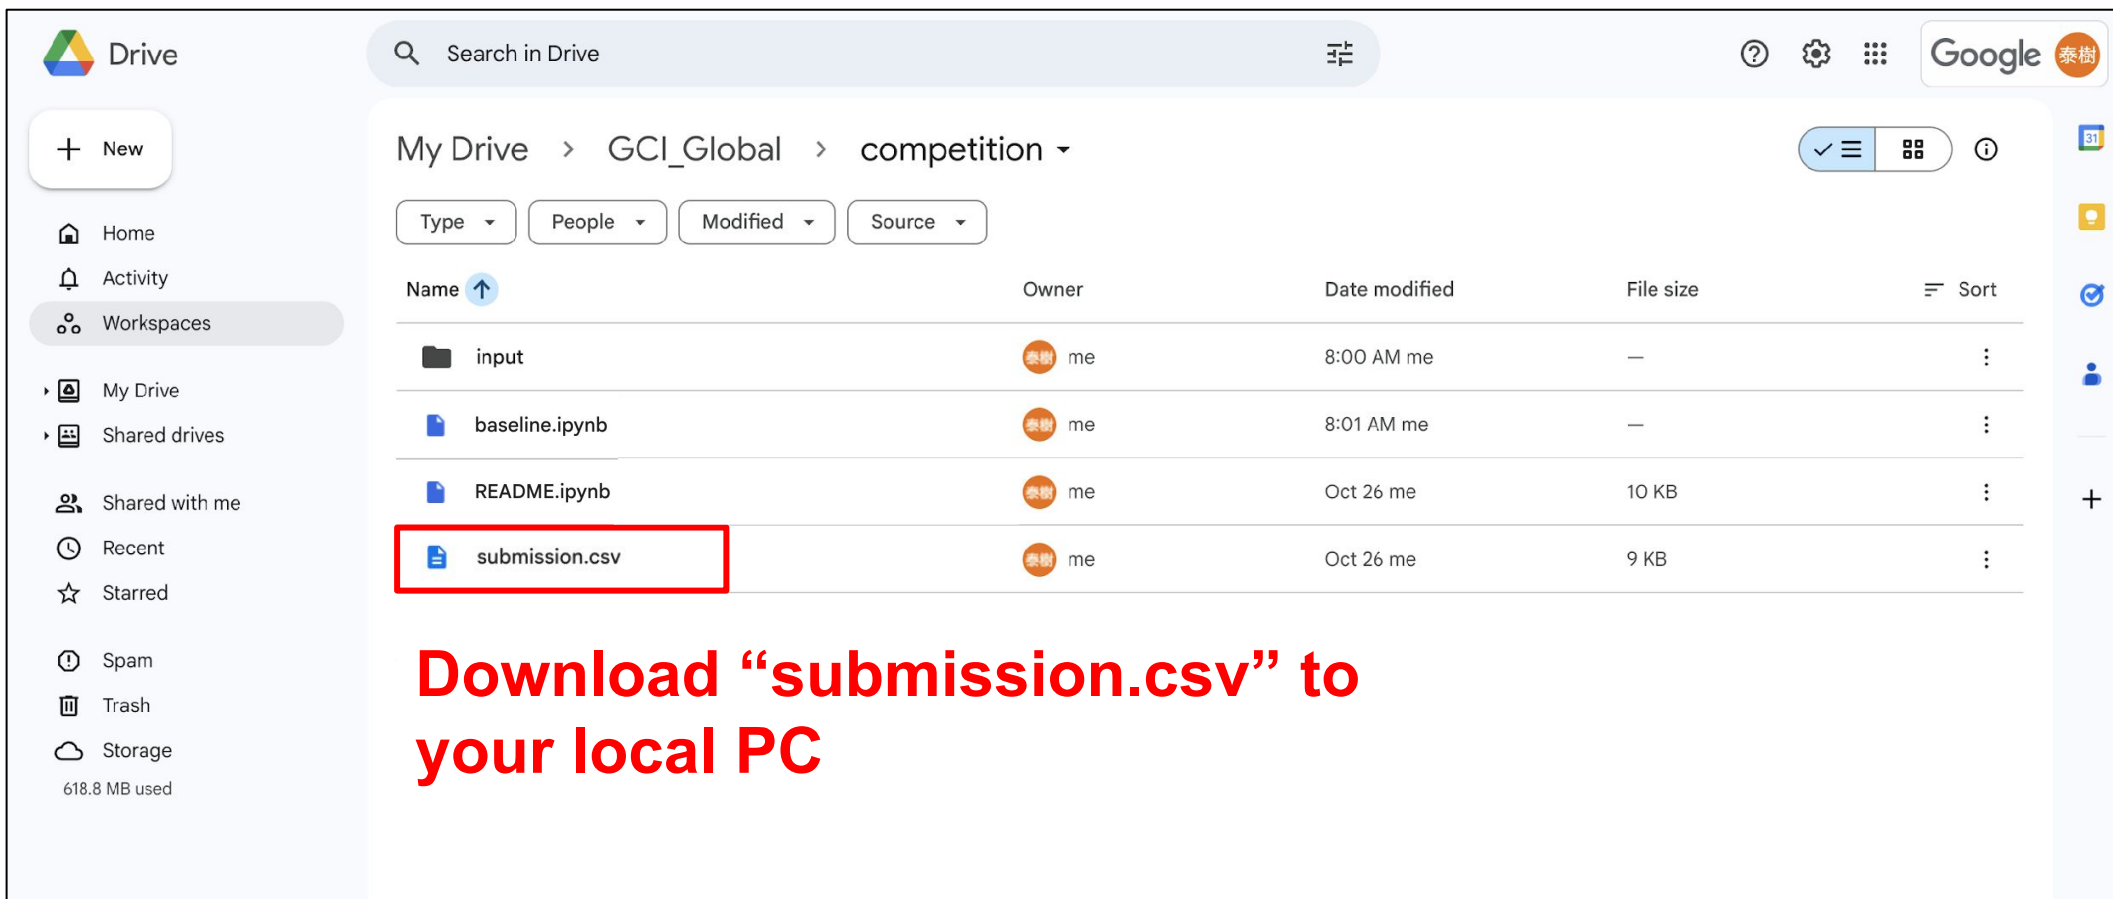

The screenshot shows a Jupyter Notebook interface. At the top, there is a menu bar with 'File', 'Edit', 'View', 'Insert', 'Runtime', 'Tools', and 'Help'. Below the menu bar, there is a toolbar with 'Commands', '+ Code', '+ Text', and a 'Run all' button (a play icon) which is highlighted with a red box. To the right of the 'Run all' button, the text 'You can run all the cells from here' is written in red. The main content area of the notebook is titled 'In-class Competition Tutorial'. It contains the following text: 'This NOTEBOOK will provide an introduction to the process of creating forecast results and the basic methodology. First, let's review the task we will be performing (see README.ipynb for details). **Objective:** To predict the probability of default based on customer data. **Evaluation metric:** ROC-AUC (Area Under the Receiver Operating Characteristic Curve)'. Below this text, there is a 'Contents' section with a list of links: '1.Setup', '2.Loading the Data', '3.Visualizing and Understanding the Data', '4.Preprocessing and Feature Creation', '5.Building the Machine Learning Model', and '6.Creating prediction results'.

Run “baseline.ipynb” to create “submission.csv”

5. Download the submission.csv

Download the “submission.csv” inside the folder.

The screenshot shows the Google Drive interface. On the left is a sidebar with navigation options: Home, Activity, Workspaces, My Drive, Shared drives, Shared with me, Recent, Starred, Spam, Trash, and Storage (618.8 MB used). The main area displays the path 'My Drive > GCI_Global > competition'. Below the path are filters for Type, People, Modified, and Source. A table lists the contents of the 'competition' folder:

Name	Owner	Date modified	File size	Sort
input	me	8:00 AM	—	⋮
baseline.ipynb	me	8:01 AM	—	⋮
README.ipynb	me	Oct 26	10 KB	⋮
submission.csv	me	Oct 26	9 KB	⋮

The 'submission.csv' file is highlighted with a red rectangular box. Below the table, the text 'Download “submission.csv” to your local PC' is written in large red font.

6. Submit on Omnicampus

Login to Omnicampus to submit your prediction and see the score.

The screenshot shows the Omnicampus submission page for the GCI Global 2025 course. The interface includes a top navigation bar with the course name and a user profile icon. A sidebar on the left lists various course items, with 'competition' highlighted. The main content area shows the 'Submit Assignment' section, which includes a 'Submit CSV File' button and a 'Submit' button. A 'Leader Board' button is also visible. Red annotations provide step-by-step instructions: 1. Click 'competition' in the sidebar. 2. Click the blue 'Submit CSV File' button and select the CSV file you want to submit. 3. Click the 'Submit' button. A red arrow points to the 'Leader Board' button with the text 'Check the leaderboard from here'.

from here

Next Steps

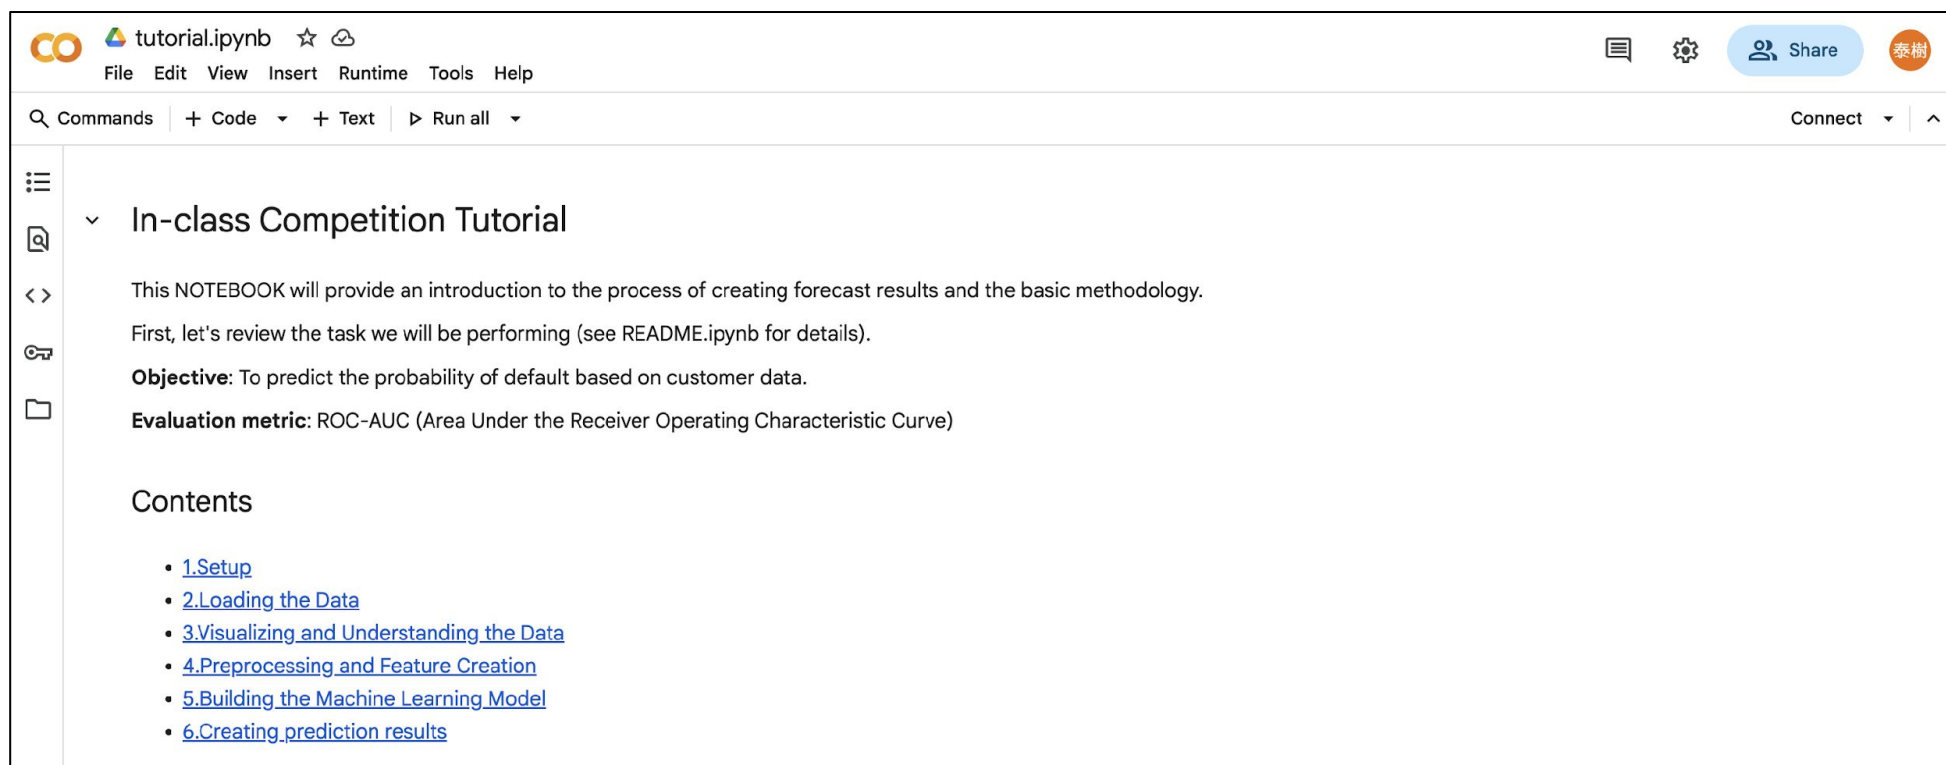

You can use the “baseline.ipynb” to customize your model.

Read the README.ipynb in “competition” folder for the details and rules of the competition.

Note: About the baseline.ipynb

The baseline.ipynb notebook is a simple baseline designed for beginners. By running it, you can generate a CSV file ready for submission to Omnicampus.

You can improve the score by **adding more features, changing the model, and tuning the hyper-parameters.**

Competition Workflow (How to improve your model)
